

High alpine protection with the SKYLOTEC Hardware Collection 2011

SKYRIDER via ferrata set

The 2009 Industry Award winner will still be available in the 2011 season. The innovative SKYLOTEC SKYRIDER represents a revolution in safety for via ferratas. The set combines two groundbreaking new system components. The new and fully patented SKYTURN connecting element replaces the second carabiner and is easy to use and unclip. The SKYTURN braking device travels along on the safety cable and in an emergency, immediately brakes a fall. The second component is the new SKYSAFE steel carabiner. Made of light, absolutely rustproof INOX steel, the carabiner guarantees high tensile and flexural strength. It is designed to provide super grip and has an extra large gate opening (31mm) to make clipping in easier.

- o Breaks falls immediately – no slipping to anchor point
- o Braking device provides extra shock absorption
- o Easy handling
- o For steel cables from 10.5mm to 18mm
- o Specially designed carabiner
- o Internal elastic connectors
- o Additional shortened arm for rest position
- o Suitable for children
- o RRP: €159.95

SKYSAFE steel carabiner

The SKYSAFE carabiner represents a revolutionary new design. For the first time it is made of steel. Its rubber casing and ergonomic design deliver outstanding grip and virtually prevent any chance of slipping. In addition, it has an extra-large (31mm) gate opening. The SKYSAFE carabiner also has ergonomic handling which saves valuable energy on more demanding via ferratas.

- o High flexural strength
- o Easier clipping & no tangling
- o Innovative gate mechanism
- o Extra-large gate opening (31mm)
- o Lightweight
- o Outstanding grip
- o 100% stainless steel
- o Conforms to norms EN 362 and EN 12275

RRP: € 24.95

SKYFIT SC 111 / 112

The 2009 ispo BrandNew Award for Hardware Accessories winner will also continue to be available in 2011. Its SKYFIT system makes it far easier to put on the harness. An elasticated waistband fits close to the body so that the harness can be easily slipped on and only needs tightening up. The SKYFIT is available in two versions – with or without elasticated leg loops and is perfectly suited to both mountaineering and sport climbing.

Weight: 370 g

Size: XS – XL

RRP: € 79.95 including chalk bag

GEKKO SC 101

The award-winning GEKKO also remains in SKYLOTEC's 2011 portfolio! The children's combination harness won the 2008 Outdoor Industry Award for its central anchor ring. The anchor ring guarantees maximum safety and prevents attached carabiners from slipping sideways. The GEKKO harness is ideal for budding mountaineers who can't wait to get up there! The combination harness is now also available in a padded version for increased wear comfort!

Weight: 450 g
Size: Kids size max. 40 kg
RRP: from € 54.95

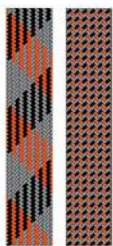

SC 102 MINITEC

The very lightweight and comfortable MINITEC was designed for mini mountaineers. Its ergonomic fit and extremely lightweight 320g make the SC 102 the ideal sit harness for children's safety in the mountains.

Weight: 320 g
Size: Kids size
RRP: € 49.95

BICO

This lightweight 9.5mm single rope delivers outstanding handling. It features a different rope pattern from the midpoint, which makes it easier to recognise when belaying, letting out rope and abseiling. The 2XDry waterproofing protects the BICO against external influences.

Weight: 61g/m
Size: 50m/ 60m/ 70m
RRP: from €159.95

GLIDE 10,2

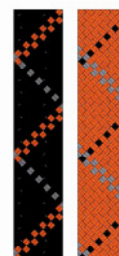

This 10.2 mm rope is suitable for all areas of climbing from walls to sport routes or alpine terrain. The GLIDE 10,2 has excellent, comfortable handling and a low impact force. Its higher sheath proportion also guarantees it a longer life.

Weight: 66g/m
Size: 50m/ 60m/ 70m
RRP: from € 149.95

Unity

This 8mm half rope is designed for alpine climbers who accept no compromises and push themselves to the limit in extreme situations. This lightweight half rope can be used either on its own or in a pair of doubled ropes.

Weight: 48g/m
Size: 50m/60m/200m
RRP: from €199,95
