

gripZone carabiner

The carabiner with gripZ

The challenge

The extreme weather conditions encountered in alpine climbing place great demands on equipment. Carabiners in particular should provide optimum grip to ensure maximum safety. Whatever the weather, whether pouring rain or scorching heat, safe and easy handling is essential.

The solution

SKYLOTEC's new patented gripZone carabiner meets these high requirements. Its impact-resistant plastic coating at the contact points guarantees outstanding grip and handling.

Under the motto "More safety and comfort for your experience" the gripZone guarantees effortless clipping and sits comfortably in the hand. Its distinctive and unusual styling also sets it apart. The carabiner has a high breaking strength and is very versatile.

gripZ:

- Weight: 44 g (wire)
- Breaking strengths: 26-8-9 kN
- Gate opening: 24 mm (wire)
- Dimensions: 100 x 62 mm
- Retail price starts from 10,95 €

Characteristics:

- Perfect handling
- Non-slip
- Durable
- High breaking strength
- Unique design
- With three different gate designs: straight, bent or wire
